A. E. MICHAEL

A GOOD PLACE TO TRADE.

Albert Callahan Killed Last Thursday by Freight Train.

Albert Callahan, aged 19, was killed at 3.30 last Thursday morning by a freight train on the C.N. track near the spur, here. The body was not cut up badly, but the head had several bad gashes and resulted in instantaneous death. It has not as yet been ascertained whether he committed suicide or was killed accidentally while crossing the track as one of his shoes was found stuck in the cattle guard.

The deceased had been in the employ of M. Zucht for a couple months prior to the accident and was reported to have gone to bed Wednesday evening about 11 p.m. and that there was no reason to arise so early unless of his own personal motive. His departure from the house was unnoticed and he was not missed until Mike came down town the next morning and was told of the fatality, to his utter astonishment.

The deceased has relatives at Vegreville who were immediately wired and the body was shipped there for interment.

Jan. 29—Dance.
Feb. 12—Old Time Concert and Dances.
March 19—Masquerade Ball.
April 5—Concert and Dance.

The next big dance in Stony will be held in Ducholke's hall on Friday, Jan. 29.

The New Hockey Pictorial.

The second edition of the Hockey Pictorial is now on the market and is more complete than the original edition which was received with such great acclaim by the followers of the Winter Sport. This book contains the pictures of all the Championship teams, both Professional and Amateur of the United States and Canada from the very beginning of the game away back in the '80's till the present. In this book is found the stories of the important play-off games, the standing of the teams in the league and also the rules of the game both Professional and Amateur.

For any further information about this great Hockey manual, communicate with George King, Publisher, 84 Victoria St., Toronto, Ont. The Price is \$1.00.

LOCAL NEWS

Mr. Thomas Shreeves, lately of Montana, is spending holidays visiting old school friends in Stony.

Mr. A. Fischer is down from Evansburg for the winter.

Gordon Lynch of Regina was a week-end visitor in Stony.

Mr. Geo. Oppertshauser was a business visitor to the city yesterday.

Mr. W. A. Ries of Spruce Grove has been appointed the district agent for the Wawanesa Mutual Fire Insurance Co. and the Crown Life Insurance Co.

Paul Meredith is leaving on an extended trip to Toronto and other Eastern points.

Mr. and Mrs. Fischer from the States are up visiting with their daughter, Mrs. John H. Forrester.

The Annual U.F.A. convention is on this week in Calgary.

The new school will be opened by the Hon. Perren Baker, Minister of Education, on Wednesday, January 27th at 2.30 p.m., when all ratepayers, parents and others interested are cordially invited to be present.

The municipal nomination day for the election of mayor and councillors is set for February 1st from 11 till 12 a.m.

Stony Plain's Financial Statement for 1925 will appear in next week's issue of the Sun.

The Supreme Court opened in Edmonton on Monday with 42 cases on the docket. On Tuesday, the first up was that of our popular electionist, "The Major" who succeeded in showing Judge Simmons just why he was not guilty.

Alberta creamery butter during the past season won 38.7 per cent of all prizes offered at the 11 exhibitions in Canada and accordingly took 275 out of the possible 710 awards offered.

Here and There

The sea fish catch on both coasts in Canada for the nine months ending September, 1925, was worth \$19,927,070, as compared with \$18,118,456 for the same of 1924, an increase of \$1,808,620.

A gold medal has been awarded to the Canadian Pacific Railway for the Company's exhibit at the Canadian National Exhibition this year. On one side of the medal is a portrait of the Hon. Howard Ferguson, Premier of Ontario, while on the other is a scene on the exhibition grounds.

E. W. Beatty, chairman of the Canadian Pacific Steamships, stated recently that more liners of the "M"-type would be built to replace older liners, such as the Marloch, Marburn and Montreal. The new ships will be similar in all respects to the S.S. Montclair and Montreal. The Marloch, Marburn and Montreal will be sold.

U. S. Farmers In Trouble

Political issues in all countries usually arise from somebody's trouble. The manufacturer initiates and supports a policy of tariff protection because he finds himself in trouble as the result of foreign competition; the farmer demands low tariffs, with a strong preference for absolute freedom in trade, because he is in trouble as a result of having to sell his products cheaply in an open world market, but obliged to buy at high prices in a protected and restricted home market. Other issues are the outcome of racial, religious, or other troubles.

At the present time, as noted in a recent article, the rubber issue of the world, and particularly of the United States, are making an issue of the regulations governing the production of crude rubber in the British possessions, and, solely because the prevailing high price of crude rubber is giving them trouble. But the rubber issue is piling into insignificance in the United States Congress in the face of the campaign being waged by the farmers across the line and which threatens to drag the tariff, and possibly other issues, into the limelight.

United States farmers are in serious trouble. They have for many years been producing large crops that are required for home consumption, and, while the rise of the surplus is diminishing with growth of U.S. population, the farmers are now in rather desperate straits. They are forced to sell their surplus in foreign markets, and at a price fixed in those highly competitive markets. The result is that the foreign price regulates the domestic price, and, as the foreign price is frequently below the cost of U.S. production, the farmer is in trouble, and especially so because the high protective tariff maintained by the United States compels him to pay high prices for all that he has to buy.

Western Canadian farmers well understand the situation. They have been confronted with exactly the same problem. They have advocated, and still advocate, lower tariffs in order to bring down the cost of production, but they have also learned to appreciate the fact that there is a point below which production costs cannot be brought in this country if a decent standard of living is to be maintained. They, therefore, in recent years, turned their attention more and more to finding a solution of transportation and marketing problems with a view to realizing a higher return from their surplus crops and not be forced to accept any price that might be offered in a demoralized world market as a result of the dumping of enormous quantities of grain on the market in one short period.

Hence in Western Canada there has been created and successfully developed huge co-operative undertakings by the farmers themselves, such as the United Grain Growers, the Saskatchewan Co-operative Elevators, the Grain Producers' Co-operative Elevators, and co-operative marketing associations of various kinds. The position of the Western Canadian farmer has been vastly improved as a result of their own co-operative enterprises, managed by themselves, apart from government, but, where necessary, with government assistance in the form of guarantees or loans.

The United States farmers have not shown the same self-reliance and initiative, and today they are demanding that the United States Government shall embark upon a policy of "price-fixing" or its equivalent—some sort of export device to get rid of the farm surplus. They argue that prices are low because all the farm products in the world are sold at European prices. They say, let a tariff be put up to maintain a high price in the domestic market, and take a loss. If necessary, on the surplus sold abroad. To this the U. S. Government answers: If the farmers profit on their product, they will produce more; the surplus will grow larger until the loss on the surplus will eat up the domestic profit.

Then there is the proposal that the tariff be reduced by bringing down the level of domestic prices until the farmer can pay at prices in proportion to what he sells. To this proposal the U. S. Government and industry in general object vigorously—they do not want the price level torn down.

The other alternative urged in some quarters is to go about direct restriction of farm production—to get rid of the problem of the surplus by getting rid of the surplus. In other words, and as previously noted in this column, to adopt the policy in regard to U. S. farm products as has been adopted in certain British possessions in regard to crude rubber production.

It is, however, interesting to Western Canadian farmers to note that Robert Bingham, chairman of the National Council of Farmers' Co-operative Associations, has emphatically declared that only in co-operative marketing, and not in tariff raising or federal handling of crop surpluses, lies the solution of the farmers' problems. In making this declaration, Mr. Bingham contrasted the courage and vision of Canadian farmers in organizing their own co-operative enterprises and solving their own problem out of their own strength and courage, with the attitude of U. S. farmers "flailing before their own picked remedy, kicking it aside, and running to Washington to ask the Great Father to throw their little feet in the path of prosperity." He urged them to emulate the example of Canadian farmers, give co-operation a trial on a large scale, not to be peasant-minded and ask somebody else to work out for them what they could do themselves, but to remain independent, resourceful American farmers.

HAD PIMPLES A WHOLE SUMMER

On Face and Neck, Lost Rest, Cuticura Healed.

"I had a breaking out of little red pimples on my face and neck. The pimples became so bad that they caused itching and burning and caused me to scratch, and the scratching caused eruptions. The eruption caused a lot of discomfort, and I lost my rest at night. I had the trouble a whole summer."

"I was treated without success. I read an advertisement for Cuticura Soap and Cuticura and purchased some, and after using one box of Cuticura Ointment and two cakes of Cuticura Soap I was completely healed." (Signed) Mrs. Forest Krick, R. 4, Rockford, Ohio.

Use Cuticura to clear your skin.

World Championship Dog Derby

Will Run From Calgary to the Great Divide and Back to Banff. A world championship dog derby to be run for the first time in the history of dog racing at the Banff winter carnival this year. This course, from Calgary to the Great Divide, and back to Banff, will be the longest dog race ever staged, according to records, and will exceed The Pax derby by 23 miles. The unique course lying over the most rugged scenery in North America will cover 113 miles.

THE DUTY OF A WOMAN

Is to Tell Her Ailing Sisters How New Health Can be Obtained

"The duty of one woman to another is to tell her. But the wrong advice is worse than no advice at all." "That," says Mrs. Florence Gibe, 311 Royal, Apt. Merriell Street, Hamilton, Ont., is why I feel it my duty to give women a little information concerning Dr. Williams' Pink Pills for Pale People. In the first place I may say that I am feeling as well as I should. I have been under the care of my physician. He informed me I would not improve until I took a change of climate. My symptoms were that I was tired out easily, pale, short of breath. On going up stairs I had a regular heart action and a weak feeling. If I entered a warm room I became hot and clammy. Black spots would float before my eyes, and I had sharp pains in my head. I did not sleep well at night and would lose round in bed. My appetite was fickle and poor. I tried a number of medicines that were advertised, with no good results. I was then dependent as when I met friends they would say, "My, you look terrible!" I lost in weight and in spirits. My husband came home one evening asking, as he usually did, how I was feeling, and at my answer said, "Well, try these," and he handed me a box of Dr. Williams' Pink Pills. He said try them and they surely gave me quick results. By the time I had taken four bottles I was feeling as well as I did when I first began. I could hardly realize it myself. People I met would say, "Why, you look splendid!"

"What have you been taking?" My reply would be that I had been taking Dr. Williams' Pink Pills, and their answer usually was, "Well, they certainly have helped you." I now sleep well and eat well. The terrible sharp pains have left my head. I do my work and feel toned up. My color has returned, and the pills have given me new vitality. I am deeply thankful that my husband brought me the first box of Dr. Williams' Pink Pills. I will gladly tell anyone what these pills did for me, and you have full permission to publish this statement in the hope that my experience may help someone else.

If you will send your name and address to Dr. J. C. Williams, Medicine Co., Brockville, Ont., a little book, "Building Up the Blood," will be mailed you post-free. The little book contains many useful health hints. You can get these pills through any medicine dealer, or you may have a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WORLD HAPPENINGS BRIEFLY TOLD

A referendum on the prohibition of spirits is proposed in the speech from the throne, read at the formal opening of parliament at Oslo, Norway.

The North West Territories imported under permit last year 236 saloons of intoxicants. Permits issued totaled 154.

More British peacocks became extinct in 1925 than in any twentieth century year except 1915, nine titles above the baronetcy rank passing.

Admission charges to the museums controlled by the city of Paris, including the carnivals, have been raised from three to six cents.

Fully 2,600 persons lost their lives and thousands of families are homeless as the result of the recent floods which swept the state of Nayarit, Mexico.

The appointment of John Leslie as vice-president and controller of the Canadian Pacific Railway, is announced by E. W. Beatty, chairman and president.

With only five members of the Ottawa Unemployed Association having paid their monthly fee of 10 cents and therefore obliged to vote, the association voted itself out of existence by three votes to two.

SUNDAY SCHOOL LESSON

JANUARY 24

JESUS AND THE SAMARITAN WOMAN

Golden Text: With joy shall ye draw water out of the wells of salvation. Isaiah 123.

Lesson: John 4:1-42.

Devotional Reading: Isaiah 55:1-11.

Explanations and Comments

The Meeting of Jesus and the Woman of Samaria, verses 5-9.—Jerusalem did not receive its Lord, and Jesus was on His way to "His own country" of Galilee when He passed through Samaria. On nearing Sychar, being wearied, He sat down to rest on the curb of Jacob's Well, while His disciples went on to the village to buy food. A woman of Samaria came to draw water. "She was a very frequent type of person, who had drifted into a hopeless and disheveled way of living. She was like a waterlogged ship, not a total wreck, but incapable of movement, and needing both to be towed and to be stored into harbor." Jesus asked her for a drink. "In surprise, she exclaimed, 'How is it that thou, being a Jew, askest drink of me, who am a Samaritan woman?'—for Jews have no dealings with Samaritans, the Evangelist explains. At this time either it was permissible to trade with Samaritans (verses 8), or the disciples ignored the lay against it; but Jesus would ask a favor of a Samaritan. See Light from Oriental Life.

The Brahman may give water to the Pariah and still retain his Brahminic pride and prejudice; he has transcended it only when he asks water from a Pariah. Racial pride and religious prejudice may be ignored when we minister to the alien or the heretic; they are transcended only when we ask the alien or the heretic to minister to us" (Howard Innes).

Russia's New Stamps

Commemorate institution of Academy of Science at Petrograd

New stamps have just been issued by Russia in commemoration of the 20th anniversary of the institution of the Academy of Science at Petrograd. The design of the new stamp gives a view of the academy, with a portrait of Lomonosov, a famous Russian scientist, who was associated with the academy in its early days. New stamps are also to be issued shortly with a portrait of the Russian radio expert, M. Popoff.

Minard's Liniment for Grippes

Aspire to Fiddling Honors John Wilder, of Plymouth, Vermont, 80 years old, and the latest aspirant to fiddling championship honors, boasts of something more than 66 years of playing, and his 100-year-old violin. He is an uncle of President Coolidge.

Still Enjoying Life at 84

Thanks To That Wonderful Remedy

Mrs. F. H. Miller, 1643-111 Ave. East, Vancouver, B.C., writes:—Five years ago my husband suffered terribly with severe attacks of palpitation of the heart and smothering spells, and two doctors stated that he could not possibly live six months.

A friend recommended Milburn's H. and N. Pills, with the result that my husband is still enjoying life at the age of 84 years.

He has improved so wonderfully that he can now climb the stairs without having those awful pains in his heart.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Shirts for cutting cloth were invented in Italy about 400 B.C., but it was two or three centuries later before corsetiers were made by fitting to the angors.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most beneficial to the growth of the child. They have attained their power in hundreds of cases and at all times are thoroughly trustworthy.

Some people can't see what pleasure those who mind their own business find in living.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother's Friend Worm Expeller.

Garnet Wheat Has Created Keen Interest With Farmers Throughout Western Canada

The satisfactory results of tests to which Garnet wheat has been subjected has aroused keen interest throughout Western Canada. Garnet Ottawa 623 is the latest variety of wheat developed at the central experimental farm at Ottawa.

According to reports, prairie farmers, anxious to try out the new wheat, are flooding the government experimental stations serving their respective districts with applications for test seed. Although preliminary milling and baking tests will be conducted before the seed is released for general distribution, a limited quantity of seed has been sent to a number of the experimental stations, which, however, has failed to meet the demand.

Giving details of the development of Garnet wheat, O. R. De Long, B.E.A., assistant superintendent of the Dominion experimental farm, Lacombe, Alta., states that the new wheat has been grown at the Alberta station since 1918. During that period, he says, it required an average of 113 days to mature, while the average for Marquis wheat was 112 days. In further comparing these two varieties, Marquis gave an average yield of 46 bushels 7 pounds an acre, against 45 bushels 17 pounds an acre for Garnet Ottawa 623.

Continuing, Mr. De Long says: "Garnet Ottawa is somewhat similar to Ruby Ottawa 623, in length and strength of straw. Garnet straw also shows a tendency to develop the rubby coloration, distinctive of Ruby. The shape of its head gives the standing crop the appearance of being a very heavy yielder."

"Garnet appears to be about midway between Marquis and Ruby in tendency to shatter if allowed to become too mature before harvesting."

"The experimental station at Lacombe has never had Garnet Ottawa 623 subjected to frost during the six years it has been grown. For this reason, no definite information is available concerning the frost resistance of this variety as compared with the others."

In the opinion of Mr. De Long, Garnet Ottawa has a place in Central Alberta and other districts where Marquis is subject to injury from early fall frosts. Whether advancing the harvest one week in districts where Marquis is not menaced by rust or early frost would justify growing Garnet in preference to Marquis, has not been demonstrated.

"Those farming in such districts should keep in mind that Marquis is accepted as the standard milling wheat throughout Canada and the United States," Mr. De Long advises. "They should also remember that Garnet is a new variety and has yet to prove its worth under varying conditions to the same extent Marquis has."

"There is little doubt Garnet Ottawa 623 will replace Ruby Ottawa 623. These two wheats mature in approximately the same time, but Garnet will outyield Ruby by several bushels per acre and does not shatter to the same extent."

Finding Farm Loans Costly

Rural Credits Act Has Cost Manitoba \$450,000 Since Its Enactment

Since enactment of the provincial Rural Credits Act, Manitoba has suffered a loss of more than \$450,000, according to a report submitted to Premier J. Bracken.

The report, which was prepared by John Wylie, superintendent of rural credits in the province, indicates that the outstanding principal and interest owing the province by the 74 rural credit societies was reduced during the eight months fiscal year by about \$380,000.

The balance outstanding was shown at \$1,230,881, with an additional interest unpaid at \$175,274.

During Northern Whittier

The Manitoba Vint Company are now operating a factory for the curing and smoking of northern whittier. This is the first attempt of this kind to be made in Edmonton and it is expected that the experiment is proving to be successful and that there is a large demand for their product.

W. N. D. 1613

May Admit Some Cattle From Britain

Department of Agriculture Considering Modification of Embargo The department of agriculture is considering slight modifications of the embargo against breeding cattle from Scotland.

The embargo has been in effect for two years against all cattle from Britain, because of the prevalence of foot and mouth disease, which, at the present time, is affecting cattle in three-fourths of England, according to official news.

Scotland and England are regarded as one unit so far as agricultural regulations are concerned. Although cattle in Britain cannot be moved from an infected area to a free area, the department of agriculture has taken all precautions by refusing to admit any cattle from Britain. Some changes are being contemplated at the present time, but no definite change has been taken to allow any cattle from the Old Country.

Many Inquiring About Canada

Queues of intending settlers Form Daily in Trafalgar Square

The success of the reduction of emigration rates to Canada is already assured. Queues form daily in Trafalgar Square, at the Canada Building, composed of men anxious to emigrate, while the number of written inquiries have surpassed all expectations.

Three young farmers walked the whole distance from Scotland to London to apply for immediate sailings, while the number of women applying for permission to sail under the new law has been surprising.

Applicants are of all classes: Teachers, dressmakers, clerks and stenographers, but they all recognize that domestic work will be their first duty when they arrive in Canada.

The London Times has given the fullest publicity to the Alberta success under which 30,000 acres of land in the Vermilion district of Alberta is to be set aside for emigrants. Most of these are expected to be Roman Catholics.

Mennonites Buy Land in Saskatchewan

Will Start Under Nearly Same Conditions As Homesteaders

Fifty-five quarter sections, totalling 5,500 acres of land north of Speers, Sask., in the Battleford district, have been purchased by Mennonite settlers from the Canadian Pacific Railway.

The purchase marks a new departure in the efforts of the Mennonites, pouring into the country from Russia since the close of the war, to become established here.

A considerable number of large farms, under cultivation, have already been purchased by the Mennonites, and have been operated during the last two crop seasons with success.

The Mennonites, numbering about 40 families, will enter upon their farming careers in Western Canada under practically the same conditions as those standpoint upon the early years of the first homesteaders. The purchasers will move onto the land on or before June 1, 1926.

Woolen Mill For Manitoba

Stated That British and American Capital is Interested in Project

Assurance that a woolen mill owned by United States and English interests will be erected in Winnipeg, was given at a meeting of the new industries committee, Manitoba industrial development board, when announcement was made that tentative site had been selected. Spun, cap, coat linings, robes and practically all woolen articles will be manufactured.

Whaling Industry in N.C.

Some 15,000 barrels of oil were put up by the Consolidated Whaling Company, of Victoria, as a result of operations of four stations from May to October last year. The oil will be used for the manufacture of toilet soaps, tanning, soap-making, fuel, and other uses, while blood and bone meal are also used for the culture of seaweed and fish.

Saskatchewan Butter Production

Total Value of Dairy Products For Province in 1925 Was \$10,846,846

Creamery butter production in Saskatchewan during 1925 showed an increase of more than 2,000,000 pounds as compared with the production in 1924, while dairy products showed an increased value of more than \$1,400,000 in comparison with 1924.

Reports received at the dairy branch of the provincial department of agriculture show the total value of dairy products in the province during 1925 was \$10,846,846.

During the year 15,850,000 pounds of creamery butter were manufactured in Saskatchewan compared with 13,855,908 in 1924, an increase of 2,000,000 pounds. The total 1925 output is more than double the production of 1921.

"The increased production is attributed principally to an increased interest in dairying, coupled with the use of better cows and improved feeding methods on the part of producers," states P. C. Kidd, provincial dairy commissioner.

"Cheese-making also, while still a very small branch of the dairy industry, has taken a decided step forward and promises soon to become an important factor. During 1925 the output of cheese was 223,137 pounds as compared with 165,000 pounds during 1924, and the value of cheese made has increased by \$17,118.

"Favorable conditions for the consumption of ice cream during the summer season caused a net increase of approximately 40,000 gallons in the quantity manufactured and sold.

"One feature during the past season has been the increase in butter exported from Saskatchewan to the British markets. During the year more than 10,000,000 pounds of creamery butter has been graded for export under the Dominion of Canada grading regulations. This represents a quantity more than double that graded under these regulations last year. It is difficult to give the ultimate destination of this butter, but it is safe to say that most of it found its way to the British market, where it enjoyed a strong demand throughout the season due to dependable quality in each grade."

Feed For Livestock

By-Products of Raymond Sugar Factory to Be Put to Use

By-products of the \$1,500,000 beet sugar factory at Raymond, Alberta, will make that district the great feeding ground of Canada. It is declared. These by-products include pulp and molasses which with alfalfa and grain make the ideal feeding combination for cattle. It is stated. Negotiations are now in progress between the sugar company and a big packing concern for the experimental feeding of a large bunch of steers near the factory. The total tonnage of beet pulp at the Raymond factory this fall was about 45,000 tons, which will be increased materially next year. There will be about 2,000 tons of syrup and a large quantity of pulp available this winter for stockmen.

Soldier Settlers Doing Well

Prosperous Conditions in Farming Communities in Alberta

A sane and sane indication of the prosperous conditions of many of the farming communities in Alberta is revealed by the fact that at the land settlement board at Calgary, payments from soldier settlers are coming in at the rate of from four thousand to five thousand dollars a day. This is regarded as most encouraging, and shows that the men are doing reasonably well. One man came in and paid up his indebtedness in full, turning in to the board the sum of \$7,400.

Never Had a Crop Failure

Horace Johnson, an old-timer of Alberta, has farmed for more than twenty years in the Champion district, and according to the figures he has kept, has averaged a wheat yield of twenty-eight bushels to the acre during that entire period. He has never experienced a crop failure though he has suffered similar to other farmers from natural causes.

Interest in Western Canadian Farms

There is further evidence of a re-awakening of interest in Western Canadian farm lands on the part of United States citizens. The Dominion board has received four hundred inquiries in response to its advertising of Central and Northern Alberta.

Western Wheat Straw May Soon Be Used For The Manufacture Of Paper

That the straw annually burned on the western prairies to the extent of millions of tons will soon become of the utmost value as the raw product from which paper is manufactured seems now almost an accomplished fact.

For several months experiments have been conducted both on behalf of private individuals and also on behalf of provincial governments to ascertain the practicability of making paper from straw. It has been demonstrated beyond a doubt that almost every kind of paper can be manufactured from straw, and negotiations are under way both in the provinces of Alberta and in Manitoba looking to the establishment of mills.

More than one process has been evolved, said to be satisfactory, and experiments dealing with straw actually raised on the prairies have been successfully carried out. The process, which has been the subject of investigation by the Alberta Government, is known as the Bache-Wilg process.

In a recent bulletin issued by the Alberta Government it is stated investigations were made into all known experimental processes for the manufacture of pulp from straw, and finally about two years ago the government made arrangements for laboratory tests of the Bache-Wilg process in the pulp and paper division of the federal government laboratories, Montreal, under the joint supervision of E. Parke Cameron, superintendent of the division, and John Bache-Wilg, who was co-inventor with his father in the process.

The government has studied carefully the results of these tests, and the trade commission has spent considerable time in the laboratory getting information at first hand.

Carl Bache-Wilg, senior, was connected with the first wood pulp and paper mill in Norway, built by his father. He owned the second grain-wood mill erected in Norway and was long identified as an expert with many of the best known wood pulp and paper mills of the United States and Canada, having been employed in an expert capacity to increase the efficiency of the obtaining of high yields and lowering costs of production.

In 1908 Mr. Bache-Wilg recommended his experiments with straw pulp in his laboratory in the United States. He continued experimenting until he had found that by his process he could very materially increase the cellulose yield from wheat and other cereal straw.

"Mullers' analysis of straw gives the cellulose as 45 per cent. 'Hoyer' gives the cellulose content of straw as 51 per cent, but this is a German analysis gives the cellulose in straw as 43.7 per cent. But Mr. Bache-Wilg obtained as high as 75 per cent of unbleached fibre from wheat straw, but found that the commercial yields gave the following results: Wheat straw, 40 to 45 per cent commercial cellulose. Corn stalks, 40 to 45 per cent commercial cellulose. Flax straw, 25 to 30 per cent commercial cellulose.

The Bache-Wilg process does not involve any radical departure from standard sulphite practice, which gives it the advantage of being able to utilize present-day standard wood pulp equipment in the manufacture of straw pulp. At the same time, it requires very much less power than is necessary in the preparation of wood pulp for the reason that the marketing, chipping and grinding processes are eliminated.

Every variety of paper is capable of manufacture from straw pulp, and semi-transparent and carbon boards for all of which there is a ready market in Western Canada. There was developed also under the process an insulating board having a distinct advantage over anything at present on the market in that it is waterproof and can be used as a wall board; it is also both water and fire resistant. This material has met with the enthusiastic

approval of architects and builders who have had the opportunity of seeing it.

Sweet Clover Benefits Land

Crop Every Five Years Followed By Summerfallow Is Best Plan

The sweet clover benefits the land in at least three ways. First, it adds root life to the soil as the root system is quite large and decays rapidly after the land is plowed. Next, it renders the soil more permeable to moisture, the decaying roots are of a spongy nature and, as they extend down at least two feet, there is a tendency to permit the soil to absorb water more rapidly than it would otherwise do. I think that this feature of soil improvement through sweet clover is one of very great importance in this province. Finally the sweet clover works in very close association with nodule-forming bacteria. It provides these nodules or little bunches on its roots for the purpose of housing the nitrogen gathering bacteria.

In order to get the most benefit from sweet clover a system of crop rotation should be planned so that the sweet clover occurs on the land once in five or six years so that summerfallow follows the sweet clover. This summerfallowing after sweet clover is quite important as it permits time for the roots to decay and for the ground to soak its moisture and also gives one a chance to kill out any stray plants which may survive. These stray plants of sweet clover are somewhat objectionable when growing in a crop of grain.

Some farmers have attempted to use sweet clover as a summerfallow substitute, but I think it is better to plant to summerfallow a year after the sweet clover. The only way that sweet clover can be used as a summerfallow substitute is to plow the crop under about the 10th of June before it gets too high. If the plowing is delayed the sweet clover grows very rapidly and then there is too great a mass of material plowed into the land. This causes the soil to dry out and delays the decay of the sweet clover itself and the result is a poor crop next year—Professor Manley Chappin.

Canada's Mineral Production

One of the Greatest Factors in Canada's Industrial Life

Great progress was made in Canada's mineral industry during 1925; wealth was expended in a boom which carried production in this field far above all previous records. In a statement issued from the Dominion bureau of statistics the total value of Canada's mineral output in 1925 is estimated at \$22,440,000, an increase of \$1,877,000 over the total of \$20,563,000 for 1924, and more than the previous record of \$22,739,645 attained in 1920 when metal prices were approximately 35 per cent higher than in the year just closed. Among the notable, remarkable advances in the production of gold, lead and zinc were most outstanding; improvement in outputs marked the totals for nickel, copper and cobalt; silver showed little change; there was an increase in the tonnage of iron ore exported from stocks at the mines.

Mining, now third in rank among Canada's primary industries, contributes extensively to the wealth and prosperity of the Dominion. Large tonnage of freight moves from and to the mines; many subsidiary industries depend upon the mining industry for their prosperity. Canada's progress in the production of mineral wealth has been notable particularly in recent years and the developments in established fields, the discovery of new mineral areas and finally the establishment of all previous records stamp the mineral industry as one of the greatest factors in Canada's industrial and commercial life.

Ireland-Norwegian Air Service

The Irish papers are talking of a possible trans-Atlantic air service between Galway and St. John, Newfoundland, a distance of 1,700 miles. The whole question of air travel in Great Britain and its development on a civil basis is to be discussed at a conference this month.

American Road Adopts Radio

Follows the Lead of the Canadian National in Broadcasting
Following the lead of the Canadian National Railways which was the first transportation company in the world to adopt radio as a means of strengthening its relations with the public and of bringing its employees into closer contact with its officers and executives, the Illinois Central system, one of the most important lines in the United States, operating from Chicago to Gulf ports and serving considerable territory, has now added radio to its activities, taking over WGES at Chicago, operated by the Coyne Electrical School from the Baldwin Pione Building, and broadcasting on a wave length of 250 metres.

BARRE, SON OF KAZAN

James Oliver Curwood
A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS
For months, Barre, the wolf-dog, carried on a ceaseless search for Nepee, the Indian girl who had been his best friend. Over all the old trails and by the familiar pool he searched for her, but he knew that something had gone out of his life. He did not know that Nepee, in escaping the unrelenting attentions of McTaggart, the brutal factor, had cast herself to the bottom of a deep abyss.

CHAPTER XXIV.—Continued

At the thresholds of the cabins he sniffed, outside of the topos he circled close, gathering the wind; the canoes he watched with eyes in which there was a hopeful gleam. Once he thought the wind brought him the scent of Nepee, and all at once his legs grew weak under his body, and his heart seemed to stop beating. It was only for a moment or two. She came out of the topee—an Indian girl with her hands full of willow-work—and Barre slunk away unseen.

It was almost December when Barre, a halfbreed from Lac la Poudre, saw Barre's footprints in freshly fallen snow, and a little later caught a flash of him in the bush.
"Mon Dieu, I tell you his feet are as big as my hand, and he is as black as a raven's wing with the sun on it!" he exclaimed in the Company's store at Lac la Poudre. "A fox? No! He is half as big as a bear. A wolf—oult! And black as the devil, M'sieu."
McTaggart was one of those who heard. He was putting his signature in ink to a letter he had written to the Company when Barre's words came to him. His hand stopped so suddenly that a drop of ink spilled on the letter. Through him, there ran a curious shiver as he looked over at the halfbreed. Just then Barre came in. McTaggart had brought her back from her tribe. Her big, dark

eyes had a sick look in them, and some of her wild beauty had gone since a year ago.

"He was like—that!" Barre was saying, with a snap of his fingers. He saw Marie, and stopped.
"Black, you say?" McTaggart said carefully, without lifting his eyes from his writing. "Did he not bear some dog mark?"

Barre shrugged his shoulders.
"He was gone like the wind, M'sieu. But he was a wolf."

"His hand stopped so suddenly that a drop of ink spilled on the letter."

With scarcely a sound that the others could hear Barre had whistled into the Factor's bar, and folding his knife, McTaggart rose quickly and left the store. He was gone an hour. Barre and the others were puzzled. It was not often that Barre came into the store; it was not often that they saw her at all. She remained hidden in the Factor's log house, and each time that he saw her Barre thought that her face was a little thinner than the last, and her eyes bigger and hungrier looking. In his own heart there was a great yearning. Many a night he passed the little window beyond which he knew that she was sleeping; often he looked to catch a glimpse of her pale face, and he lived in the one happiness of knowing that Marie understood, and that into her eyes there came for an instant a different light when their glances met. No one else knew. The secret lay between them—and patiently Barre waited and watched. "Someday," he kept saying to himself, "Someday"—and that was all. The one word carried a world of meaning and of hope. When that day came he would take Marie straight to the Missioner over at Fort Churchill, and they would be married. It was a dream that made the long days and the longer nights on the trap-line patiently endured. Now they were both, slave to the environment. Power. But someday!

FOR GIRLS WHO WORK

Lydia E. Pinkham's Vegetable Compound Is a Great Friend—It Stops Pain and Restores Health

Toronto, Ontario.—"I work in a factory and I would have to get away from my work every time I was sick. The dragging-down pains and cramps were very bad, but I was too weak to get away. It hurt so that I couldn't lie down. I heard some of the girls talking about Lydia E. Pinkham's Vegetable Compound, and they told me to try it. I have taken about a dozen bottles of it and it has done me a lot of good. I never have any pains or sore back now, and have been better from work a day since I have taken it. I recommend the Vegetable Compound when I have the opportunity."—Miss ROLFE, 21 Howie Avenue, Toronto, Ontario.

"The Advice of a Friend"

Halifax, Ontario.—"I was terribly pained and a few odd times I almost fainted. I used to do housework until a few months ago and sometimes I had to leave my work and go to bed. I am now a member of the knitting mill. I suffered five or six years from painful periods before I took Lydia E. Pinkham's Vegetable Compound. I got relief almost immediately, and I tell my friends what a good medicine it is. You may use the testimonial if you like, if it will help others."—Miss J. PRINCE, Victoria Street, Halifax, Ontario.

McTaggart's post went back only as far as the great-grandfather end of it, the older evidence of ownership being at Churchill. It was the finest game country between Redfleur Lake and the Barren Lands. It was in December that Barre came to it.

Again he was travelling southward in a slow and wandering fashion, seeking food in the deep snows. The Killdeer, the Great Stom, had come earlier than usual this winter, and for a week after it, scarcely a hoof or claw was moving. Barre, unlike the other creatures, did not bury himself in the snow and wait for the skies to clear and crust to form. He was big and powerful, and restless. Less than two year old, he weighed a good eighty pounds. His pads were broad and wolfish. His chest and shoulders were like a Malemute's, heavy and yet muscled for speed. He was wilder between the eyes than the wolf-breed husky, and his eyes were larger, and entirely clear of the Wulfoot, or bloom-line, that marks the wolf and also the extent the husky. His jaws were like Kazan's, perhaps even more powerful. Through all that week of the Big Storm he travelled without food. There were four days of snow, with driving blizzards and fierce winds, and after that three days of intense cold in which every living creature kept to its warm den out in the snow. Even the birds had burrowed themselves in. One might have walked on the backs of caribou and moose and not have guessed it. Barre chattered himself during the worst of the storm but did not allow the snow to gather over him.

Every trapper from Hudson's Bay to the country of the Athabasca knew that after the Big Storm the fabled fur animals would be seeking food, and that traps and deadfalls properly set and baited stood the biggest chance of the year of being filled. Some of them set out over their traplines on the sixth day; some on the seventh, and others on the eighth. It was on the seventh day that Barre started over Pierre Eustach's line, which was now his own for the season. It took him two days to uncover the traps, dig the snow from them, rebait the falls, "trap-houses," and re-arrange the baits. On the third day he was back at Lac la Poudre. It was on this day that Barre came to the cabin at the far end of McTaggart's line. McTaggart's trail was fresh in the snow about the cabin, and the instant Barre sniffed it of every drop of blood in his body seemed to leap suddenly with a strange excitement. It took perhaps half a minute for the scent that filled his nostrils to associate itself with what had gone before, and at the end of that half-minute there rumbled in Barre's chest a deep and sullen growl. For many minutes after that he stood like

a black rock in the snow, watching the cabin. Then slowly he began circling about it, drawing nearer and nearer, until at last he was sniffing at the threshold. No sound or smell or life came from inside, but he could smell the old smell of McTaggart. Then he faced the wilderness—the direction in which the trap-line ran back to Lac la Poudre. He was trembling. He was making a dash for it. Pictures were assembling more and more vividly in his mind—the fight in the cabin. Nepee, the wild chase through the snow to the chasm's edge—even the memory of that age-old struggle when McTaggart had caught him in the rabbit snare. In his white there was a great yearning, almost expectation.

Slowly he followed the trail and a quarter of a mile from the cabin struck the first trap on the line. Hunger had carved in his sides until he was like a starved wolf. In the first trap-house McTaggart had placed as bait the hindquarter of a snowshoe rabbit. Barre reached in cautiously. He had learned many things on Pierre's line; he had learned what the snap of a trap meant; he had felt the cruel pain of steel jaws; he knew better than the shrewdest fox what a deadfall would do when the trigger was sprung and Nepee herself had taught him that he was never to touch a poison-bait. So he closed his teeth gently in the rabbit flesh and drew it forth as cleverly as McTaggart himself could have done. He sniffed the traps before dark, and ate the five baits without springing a pan. The sixth was a deadfall. He crept about this until he had beaten a path in the snow. Then he went on into a warm barn swamp and found himself a bed for the night.

(To be continued)

Corn cannot exist when Holloway's Corn Remover is applied to them; he causes it goes to the root and kills the growth.

Little Helps For This Week

Be content.—Luke III, 14.
Be thou content; be still before His face, whose right hand doth reign.
Fullness of joy for evermore,
Without whom all is all in vain.
He is thy living spring, thy sun,
whole rays,
Make glad with life and light thy dreary days.

Be thou content.

I do not think the road to contentment lies in despatching what we have not got. Let us acknowledge all good, all delight that the world holds, and be content without it. But this we can never do but by possessing the one thing—without which it is not merely say we ought to be content, but no one can be content—the Spirit of the Father.—George MacDonald.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, sprains and sprains. The presence of this remedy in the family medicine chest saves many a fee.

How Robert M. Koenig Found Remedy for Pimply Skin

For years my skin would break out every once in a while—and sometimes did very little to help me.

I read a doctor's article stating that pimply skin usually comes from the stomach—and honestly not getting rid of the poison.
I tried Carter's Liver Pills for a few days—and since that time my skin never again broke out. Now I tell my friends the right way of getting rid of a broken out skin—and also of steering clear of upset stomachs and sick headaches. Carter's are all you claim for them.

Manitoba Fox Industry
Manitoba as a fox-raising province is coming into the limelight. In Vancouver's first annual fox show, out of ten open entries Winnipeg foxes secured nine first prizes and one second, in addition to four championships and three special trophies.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and colds, coughs, burns, scalds, cuts, bruises and sprains.

Mineral Production in B.C.
Mineral production in British Columbia for 1925 is estimated at \$62,000,000, an increase of 36 per cent. over 1924, by the British Columbia Chamber of Mines. The largest individual mineral production is in lead, which ran up to nearly \$15,000,000. Zinc was practically 100 per cent. more in 1925, being valued at about \$4,500,000. More than \$2,500,000 in dividends was paid by British Columbia mines during the year.

Minard's Liniment relieves headaches

PEPS

AT this season everybody needs the Pepsa's breathable tablets to ward off cold and chills.

As Pepsa dissolves in the mouth, their rich medicinal juices carry soothing and healing benefits direct into chest and lungs.
Inflammation and soreness in throat bronchitis is quickly allayed by Pepsa, coughs and colds are stopped in the bud, and the entire breathing system is wonderfully strengthened and fortified. All druggists sell box.

The distinction of being the first woman baroness of title is likely to fall to Lady Clifton of Leighton Bromwold, a baroness in her own right.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy for Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mother's have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children, as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medical dealers at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Occasionally one meets a man whose mind is so weak that it can't even wander.

A STANDARD FOR LAND VALUES IS PLAN SUGGESTED

Brandon.—The United Farmers of Manitoba will be asked to request the Canadian council of agriculture to formulate and present to the Dominion Government a policy on the standardization of land values in the Dominion.

Following the presentation of the report on the work of the council, H. P. Nicholson, Dauphin, Man., asked J. W. Ward, secretary of the council, who presented the report, if the council had any policy on standardization of land values.

Mr. Nicholson drew the attention of the convention to the influx of immigrants expected to result from the new and low schedule of transportation rates from points in the British Isles to Canadian provinces. He warned that if any great numbers of immigrants did arrive, land prices would be likely to rise far above the producing value.

Mr. Ward replied that the Canadian council of agriculture did not have the matter before it in concrete form. He agreed that the matter was one requiring attention and suggested that a resolution be placed before the convention outlining a policy. This would have the effect of placing the subject before all the western conferences of farmers' organizations, and if the policy met with their approval, before the Dominion Government, through the council.

President A. J. M. Poole, of the United Farmers of Manitoba, said that there was great need for action toward standardization of land values. Mr. Nicholson said he would prepare a resolution which will be placed before the convention.

Case Important To Automobile Dealers

Supreme Court Must Settle Disputed Point in Contract Sale

Victoria.—Leave to appeal to the Supreme Court of Canada on a matter of importance to Canadian automobile dealers was granted by the British Columbia appeal court here. The point at issue is whether a purchaser of an automobile or any other article purchased on a similar condition, contract of sale can sue the vendor for any profit he makes on a resale where a car has been surrendered through failure to fulfil the terms of the contract.

E. C. Mayers made the application in the case of Solomon Chan vs. C. Motors of Vancouver. The judge in the lower court held that a purchaser who had fallen in his contract and surrendered the article purchased, was entitled to sue the vendor for any balance over the contract price secured on a resale. The defendant carried the case to the appeal court and by a majority of one the appeal court upheld decision of the court below.

Went Alberta Coal
Toronto.—Feminile voices have been raised in protest against Mayor Thomas Foster and his colleagues on the city council. The disapproval was voiced at the meeting of local council of women, and arose over the action of the city fathers in buying two thousand tons of Pocahontas coal for civic sale. The women were strongly of the opinion that Alberta coal, "this splendid coal," should have been bought.

Butter Price Lower At Coast
Vancouver.—With the arrival here from New Zealand of 8,000 boxes of butter, or approximately 448,000 pounds, prices declined here 2 to 3 cents a pound after having been steady at 12 cents a pound wholesale for several months. Most of the New Zealand butter, it is said, is for local consumption, although some of it will find a market in Eastern Canada.

Studying Labor Conditions
New York.—Lady Cynthia Moseley, and her husband, Oswald Moseley, arrived on the Majeestic to make a study of labor and industrial conditions in this country. Lady Cynthia, daughter of the late Marguerite Curzon, said she and her husband would stand for parliament at the next British election.

Saskatchewan's Sound Economic Position

Premier Dunning In Budget Speech Says Financial Conditions Improved

Regina, Sask.—Declaring that Saskatchewan farmers would receive nearly \$100,000,000 more from the sale of their surplus farm products in 1926 than in 1925, Premier Dunning, in his tenth budget speech in the legislature here, stated that general economic conditions in Saskatchewan were better now than they had been at any period since the first war. At the same time he urged the need for continued care, as well as confidence in the future.

The government did not propose to impose any new taxation or increase any existing taxation. Saskatchewan closed the fiscal year ending April 30, 1926, with a cash deficit of \$166,385, but this was covered many times in money owing to the province under the public revenue tax, the wild land tax, the old supplementary revenue tax and unpaid succession duties aggregating \$1,939,145, he said. These arrears had been reduced by a little over \$200,000 as compared with the previous year.

Mr. Dunning indicated the government was watching the operation of a gasoline tax in other provinces and declared that investigation made by the government showed that a three cent tax of three cents a gallon on gasoline would not permit of motor license fees being reduced by more than 45.

British Mine Survey Nearing Completion

Chairman of Royal Commission Summarizes Proposals to Operators

London.—The royal commission which is making a survey of the coal industry entered the final stages of its task when it heard the proposals of the operators, as explained by Evan Williams, president of the national board for the coal mining industry. These proposals were summarized by Sir Herbert Samuel, chairman of the commission, as follows:

The men to work an additional hour without extra remuneration; wages to be reduced in certain districts; the operators to effect a reduction of 10 per cent on cost other than wages; railway rates to be reduced; the immediate temporary dismissal of 100,000 men.

German Chancellor Forms New Cabinet

Dr. Luther Was Given Mandate By Von Hindenburg

Berlin.—President Von Hindenburg has commissioned Chancellor Luther to form another cabinet.

Dr. Luther was given the mandate after both Erich Koch, the Democratic leader, and former Chancellor Ebert, of the Centre Party, had informed the president that a "big coalition" government was impossible. When Dr. Luther's cabinet was formed early in December, following the signing of the Locarno treaties, it was announced the resignation was to leave the way clear for the formation of such a coalition to carry out the Locarno policies.

Women Helping the Blind

Edmonton, Alta.—The Canadian National Institute for the Blind has two teachers of the blind stationed in Alberta. These are Miss Fisher, of Edmonton, and Mrs. McKellar, of Calgary. Both are blind, but at one time had their sight, a fact which is of immense value to them. They travel over their fields, teaching and advising, and doing an enormous amount of work in bringing a new vision of life to those who are handicapped.

Ancient Life of America

Minneapolis.—Evidence that life existed in Minnesota 200,000,000 years ago, is said to have been discovered by Professor Grout, of the University of Minnesota. The evidence, consisting of microfossils forms of plant life, which indicated animal existence, was found imbedded in iron rock foundations.

Would Abolish Tax

Winipeg.—Abolition of stamp taxes on commercial documents will be urged upon the Dominion Government by the Winipeg board of trade.

NO DATE FIXED AS YET FOR THE EMPIRE PARLEY

London.—It is understood that nothing definite has developed yet as to the date of the proposed imperial conference here. The governments of the various dominions have replied to the British Government's inquiry as to what time would suit their representatives to come to London to discuss imperial matters with representatives of the imperial government, but further communications will have to pass between the British government and the overseas administrations before any further decision can be reached.

A suggestion has been made that there may be elections pending or imminent in some of the dominions and it is thought October, or perhaps a later month, might be considered as more likely to suit the convenience of all concerned.

Wants Million New Settlers

Homelessers Greatest Need of B.C. Says Premier Oliver

Vancouver.—What British Columbia needs is a million new people imbued with the industry and thrift possessed by the early pioneers of Ontario, said Premier John Oliver during the course of an address given at the annual dinner of the Associated Property Owners. "The greatest need of this province is homelessers and homelife."

Industry had increased six-fold in British Columbia during the last ten years, he continued. "There was no place on the face of the earth where 550,000 people produced as great an aggregate of wealth as in British Columbia."

It would be difficult to convince him that taxation was keeping British Columbia back when people were paying into the coffers of the province a million a month for luxuries that caused them more harm than good.

British Families Coming

Over Six Hundred Families Are Waiting to Sail to Canada in the Spring

London.—Over six hundred British families are waiting to sail for Canada in the spring having been accepted by the Canadian director of migration as suitable settlers under the scheme to establish 2,000 families in the Dominion, according to the overseas settlement department of the office of the secretary of state for the dominions. The Canadian authorities in London confidently expect that the British families will be ready to leave for Canada by the middle of June next.

These 900, or more families, it is stated, will account for nearly half the number of families which the Canadian government has available for settlement.

Wins Wheat Championship

Seager Wheeler Captures Farm Crops Trophy at Saskatchewan Seed Fair

Saskatoon.—Seager Wheeler, of Rosburn, won the championship in wheat and the farm crops trophy at the provincial seed fair at the university here, while William Darnborough, of Laura, won the oats championship and T. Eaton, Cud, and incidentally took the Darnborough Cup for sweet clover.

Each of the champions came first in other classes, while the International Harvester Company Challenge Shield was won by the Laura Agricultural Society, with 481 points; Moses Jaw, for seven years champion, coming second, with 369.

Gold in Italy

Rome.—"Bunny Italy" is far from sunny. From the foothills of the Alps to Naples, the country is shrouded in snow under grey skies and shivers in the grip of a cold wave, with the mercury showing freezing temperatures everywhere.

Many Divorce Cases

Ottawa.—One hundred and twenty applications for divorce are before parliament this session. One hundred are from Ontario, eleven from Quebec and one from British Columbia.

Urges Federal Aid For Coal Shipments

Alberta Coal Operators Would Send Half Million Tons to Ontario

Calgary.—A resolution urging the Federal Government to assist with the immediate shipment of half a million tons of coal to the Ontario market and the recommendation that the Alberta Government appoint a coal council for the province to assist in expanding the existing coal market featured a general meeting of Alberta coal operators called by the coal section of the Edmonton board of trade which was held here.

Toronto.—Hon. Charles McRae, Ontario minister of mines, stated that word had been received that the 7,500 tons of Alberta coal forming the balance of the 25,000 tons summer shipment by this C.N.R. would be moved at once. "It is expected it will all be at the respective destination points in Ontario by the first week in March. The mines department had received no further communication as to sending Alberta coal in excess of the quantity about to be delivered."

Want Four-Day Fair

Prince Albert Delegates to Present Request at Regina Convention

Prince Albert, Sask.—If the arguments of the representatives of the Prince Albert Agricultural Society delegated to the annual convention of the Western Canadian Fair Association in Regina on February 2 and 3 are heard and approved, this city will return to a four-day exhibition this year instead of three days.

This was the unanimous decision of the directors of the society at their meeting. The two delegates named to the Regina convention, C. C. Gable and J. P. Curror, were instructed to ask for four days immediately following those given to Regina so that the local society would be in a position to secure good exhibits from the various government departments.

Russia To Participate

But Russia-Swiss Relations Must Be Adjusted Meanwhile

Berlin.—Soviet Russia will participate in the preliminary disarmament conference at Geneva, it is learned unofficially, on condition that Russia-Swiss relations are adjusted meanwhile. Soviet participation would mark the first Russian co-operation with the league.

France and Great Britain are pressing Belgium to come to terms with Moscow. Russia's decision to come to Geneva, even on conditions, represents a defeat for the extreme Communists of Moscow, who, under the leadership of Gregory Zinoviev, suffered a reversal in the recent Communist elections. The moderates appear to be in power in Moscow now, although the theory of Communism is not affected thereby.

Marketing Agreement Becomes Operative

Agreement Entered into Between Canadian Millers and Wheat Producers

Winnipeg.—The pact struck between Canadian millers and the Canadian Co-operative Wheat Producers for the marketing of Canada's wheat crop will become operative within a week. B. I. Smith, sales manager of the producers' agency has announced. Only part of this year's crop will be handled through this medium, he indicated. As a result of mutual advantage to both interests was entered into as a result of negotiations which have been progressing several months.

Receives New Appointment

London.—Percy Gillmer, a journalist and former commissioner of immigration for Australia in London, has been appointed general manager of the Pacific cable board. His salary, according to the Daily Express, will be \$2,000 a year.

Explosion Kills Miners

Wilburton, Okla.—Most of the 108 men working in the Dogman McConnell mine, three miles west of here, are believed to have been instantly killed in a terrific explosion that wrecked the main shaft and smashed the shaft.

London schools housed 797,378 children last year.

WILL ESTABLISH AGRICULTURAL RESEARCH FUND

Regina.—Establishment of the "Saskatchewan Agricultural Research Foundation," enabled by payment to the province of the \$25,200 surplus on operations of the Canada war-time wheat board, was approved by the legislature on recommendation of the committee on agriculture.

Interest on the principal sum will be utilized to defray expenses of the foundation, which is designed to deal with the following: For scientific research of plant and animal diseases and soil problems; for investigation of agricultural marketing; to provide scholarships for promising students from Saskatchewan to the College of Agriculture, and for graduates of the agricultural college.

The committee's recommendation consolidates the suggestions previously made by Premier Dunning, Dean Rutherford, Hon. C. M. Hamilton, minister of agriculture, and the Saskatchewan Grain Growers' Association.

Start Campaign For Fair Trading Policy

Retail Merchants Ask Guarantee of Reasonable Profit on Trade Marked Nationally Advertised Goods

Toronto.—A campaign to establish a fair trading policy between the manufacturer, wholesaler and retailer which will guarantee to the latter a reasonable margin of profit on trade marked nationally advertised standard goods was launched here under the auspices of the Retail Merchants' Association of Canada.

The campaign is being conducted by the association throughout Canada. The campaign will be directed to four lines of trade; grocers, auto tires and accessories, implement dealers, and booksellers.

The request also has been made by hardware, shoe and clothing dealers to take action along the same lines for them.

No Shortage Of Rubber

Substantial Increase in Production Estimated For This Year

London.—Referring to the near approach of the annual survey of the rubber situation by leading London rubber firms, the Daily Mail says it is believed some of them will put the world's consumption for 1925 at 560,000 tons and estimate the production for 1926 at \$30,600 tons. On this assumption, says the Daily Mail, there is room for a 12 1/2 per cent increase in consumption this year before production is overtaken. This estimate, generally speaking, says the newspaper, seems to indicate that, although prices still may give handsome profits to producing companies, there will be no serious shortage of rubber. A Reuters dispatch from Batavia says estimates show an increase of 50 per cent in the native rubber production for 1925.

Develop Riding Skill

Challenge Cup Is Offered For Military Riding Competition

Toronto.—With the object of promoting interest among military men in riding skill, Alfred Rogers, Sr., has donated a challenge cup to be awarded to the best competitor. The competition will be open to officers and ex-officers in all branches of the service. Uniforms must be worn and the only marks to be scored will be for the performance of the mounts.

Contests will be held at the Toronto Hunt, the final in June.

Russian Cattle Perish

Venza, Russia.—Cattle to the number of 10,000, or 54 per cent of the total cattle in Venza province, and 11,000 horses, 48 per cent of the total, have perished for lack of forage and from disease.

To Chase Run Runners

Chicago.—Four men and two airplanes will be based at Chicago by the United States coastguard next spring to clear Lake Michigan of train runners.

ON THE AIR

What is Doing in the World of
Radio

Straight advertising over the radio is selling coffee, paint, women's frocks and a dozen other commodities every day in Seattle.

The only kind of radio receiver found useful in mountainous Switzerland is the many-tubed set. Cheaper sets can't combat the interference offered by mountains and valleys.

In 1899 the first wireless communication was established between England and America. Today, year after year, radio communication is possible not only between England and France, but also between America and Europe.

A Canadian Government radio station opened at Aklavik, within 80 miles of the Arctic Ocean, is to touch with Edmonton, Alberta. This makes the fourth station in a chain to link the Arctic region with civilization.

Following restoration of atrophied ear nerves in two deaf mutes through listening in on three-tube radio sets, Thos. Rodwell, superintendent of the Manitoba School for the Deaf, has ordered several instruments and announced encouraging progress with younger mutes.

Calgary recently witnessed the delayed fall meeting of the Alberta Radio Experimenters' Association, an organization to promote radio research in the province of Alberta. Addresses were given by a number of the members on technical subjects, covering research work done since the last meeting some months before.

Economy in British Army

War Office Demands Use of Iron Straps for Cavalry.
British cavalry officers have been trembling in their boots because of an economy wave which has swept through the war department.

Spirs have been toned down a bit in their shine and polish, but their angle has not been interfered with.

Spats in the army camp under the ban some weeks ago as unnecessary. Now the nickel stirrups, of which the cavalrymen have been proud, are being replaced by iron stirrups, which are cheaper, and the officers' spurs to be handed out by the department are to be of a steel substitute which will still shine but not cost the government so much money.

CLIPSE FASHIONS

Exclusive Patterns
by H. L. B. J.

1243

Two-Piece Costume Approved By Smart Women

Two-piece sports and tailored costumes are things of much more elaboration as far as fabric is concerned, than those worn earlier in the season, which were usually developed in jersey and rayon. Now the modern attitude is toward making these costumes in crepe satins and velvet, or a combination of both. In the model picture here satin has been chosen for the new finger-tip length blouse and velvet for the skirt. The velvet was employed to fashion the snug-fitting collar, cuffs and trimming-bands. The skirt is joined to a bodice top and has two inverted plaits at the front to add freedom and the latest fared movement. The diagram shows that 1243 is in sizes 16, 18 and 20 years (34, 36 and 38 inches bust). Size 16 years (36 bust) requires 4 1/2 yards 36 inch, or 2 1/2 yards 64-inch material. The bodice top of skirt requires 1 1/2 yards 36-inch additional lining, or with ribbon straps over the shoulders 3/4 yard. Price per suit.

Want "Leap Year" Week

German Spinners Want More Chances To Secure Husband

German spinsters weary of indirect methods of securing the elusive male are agitating for a recognized "Leap Year" week in each year, during which it shall be their privilege to propose. The idea has been presented to the government marriage bureau and proposes that there be declared to one not but seven days be dedicated to St. Catherine, the patroness of unmarried women.

Several spinsters' organizations are backing the proposal.

Officials of the marriage bureau say that when a girl in Germany is 25 years old and unmarried her chance of getting a husband are about one in five. Although the number of marriages has been restored to pre-war figures, it is notable that those below middle-aged spin and comparatively young girls are more and more frequent.

Queen Alexandra Memorial
A fund of about \$50,000 is to be subscribed for a national memorial to the late Dowager Queen Alexandra. The money will be used to assist Queen Victoria's Jubilee Institute of Nurses.

Manitoba Government Phones
The Manitoba Government (telephone system) completed its fiscal year with a profit of \$150,000, a surplus of nearly \$155,000 over the estimated revenue.

Prosperity For Canada

No Doubt That Corner of Depression
Has Been Turned

For some time past business men and economic observers in Canada have been saying that trade is on the up grade and that the corner of depression stage the war has been turned. Now there seems no doubt of it. Figures to the end of November have been issued at Ottawa and they show that Canadian exports are sixty million dollars more than in the previous year, and about four hundred and seventy millions more than in 1922. There is this year a favorable balance of trade of \$246,000,000 in exports over imports. That is a tremendous contribution to national prosperity and means a substantial amount in individual comfort and happiness.

Much of this is due to the big field crops, the second largest on record, and, of course, when the farmers of the west have money, it follows that industry in general is doing its best. The real results of the big harvest will be felt in the manufacturing section next year.

Burmese Ex-Queen

Was Sinister Figure

Said To Be Influence Behind Mandalay
Massacre in 1919

A romantic and sinister figure was removed from Burmese life when, at her bungalow at Rangoon, the ex-Queen, Supayalat widow of King Theebaw, died from heart failure at the age of 57.

Upon the death of King Mindaon in 1878, one of his wives schemed successfully for her daughter, Supayalat, to marry Theebaw. There followed in 1879 the massacre of Mandalay, in which the late King's sons, their wives and children and others were murdered. Supayalat was alleged to be the influence behind all Theebaw's acts then and in the chaotic reign which followed.

Avoided Expense Of

Going To Hospital

That's Why Madame L. Genoud
Recommends Dodd's Kidney
Pills

Alberta Lady Relieved of Anemia, Gastritis of the Stomach and Neurasthenia.
Charron, Alta.—(Special).—"I have suffered for twenty years with bad kidneys. Have been treated from time to time for the same, but to no avail. The stomach and neurasthenia and no food for succeeded in relieving me. I arrived at the most critical period of my life and felt very sick. A good neighbor told me about Dodd's Kidney Pills. In eight days I was on my feet again, avoiding the expense of going to hospital. I can recommend your marvelous pills to all persons who suffer like I did."

This statement was sent to us by Mrs. L. Genoud, a well-known resident of this place. Dodd's Kidney Pills strengthen weak kidneys and put them in shape to do their full work of straining the impurities out of the blood.

Dodd's Kidney Pills can be obtained everywhere or The Dodd's Medicine Co., Ltd., Toronto.

Must Trade Mark Goods

Turkey Takes Steps To Safeguard Foreign Trade

After three months, all goods produced in Turkey must bear registered trade marks. This order is the outgrowth of a situation that has been detrimental to the country's trade. It appears that Greek and Armenian refugees living in Greece and Bulgaria have been sending to foreign markets stolen, furs and value of an inferior quality, but marked "Turkish."

Forget the good you have done to others and the evil they have done to you if you would be happy.

More tin is produced in Alaska than in all of the rest of the United States combined.

FROST BITES

Prevent complications by rubbing the affected parts with Minard's. It draws out inflammation, soothes and heals.

Answer to Last Week's Puzzle

Saskatchewan Hog Pool

Will Send Delegation to Europe to Study Bacon Industry

Offices for the proposed Saskatchewan Hog Pool have been opened in Saskatoon. Meetings are being held at various points throughout the province and volunteer organizers are now in the field. A fund is being supported by the Farmers' Union to send a delegation to Great Britain, Ireland and Denmark to study the bacon industry there.

Perhaps, suggests Ignatius Plim, the reason the seventh day was made for rest was because seven days of solid labor would have done one week.

Lots of people spend the last half of their lives trying to forget what they learned the first half.

The Island of Yap, which has suffered from a severe storm, is by far the most important cable station in the Pacific. It has a branch of the American Pacific cable to the Philippines, and has branch lines radiating to Japan, to Shanghai and to the Dutch East Indies.

Colds Are Not Necessary Evils

Observance of One Fundamental Rule of Health Protects Against Them

Whether one catches cold easily is largely a question of physical condition. If the general vitality is low, resistance to disease is weak and at such a time a cold is easy to contract and difficult to check.

Consequently, frequently the cause of such a state of health, with its attendant listlessness, biliousness, headaches and a general lack of vitality. Poisons from the waste matter that remains behind after improper, irregular bowel elimination are picked up by the blood and carried to every part of the body. They weaken your resistance to disease.

Thousands of people who have suffered from self-poisoning in this way have found that *Nijel*, the internal lubricant makes bowel elimination sure and easy. *Nijel* reduces the waste matter and permits thorough and regular elimination without overtaxing the intestinal muscles. *Nijel* can be taken for any length of time with no ill effects. If you take cold easily, run your druggist for *Nijel* to-day—and remember, look for the name *Nijel* in red on both bottle and package.

From School Teacher To Great Eminence

A young man who was brought up on a farm in Western Pennsylvania studied diligently and qualified for district school teacher. Further pursuing his studies and teaching, he managed to save up enough money to put him thru medical college. After the Civil War, he began the practice of medicine in the city of Erie, Pa., and often rode horseback thru the woods to reach and relieve those who were seriously ill. He was a student of nature, knew and could easily recognize most of the medicinal plants growing in the woods. Later, he moved to Buffalo, N.Y., where he launched his favorite remedy, and, in a short time, they were sold by every druggist in the land. Today, the name of this man, Dr. H. V. Pierce, is known throughout the world. His *Golden Medical Discovery* is the best known blood medicine and tonic. More than fifty million bottles have been sold. If your druggist does not sell the "Discovery" in liquid or tablet, you can obtain a trial pkg. of the tablets by sending 10c to Dr. Pierce's Branch Laboratory in Heidelberg, Ont.

NOTICE!
**TOWN OF STONY PLAIN
MUNICIPAL ELECTIONS 1926**
PUBLIC NOTICE is hereby given that a meeting of the electors of the Town of Stony Plain will be held at the Town Hall, Stony Plain, on Monday, the 1st day of February, 1926, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of nominating candidates for the office of Mayor and Councillors for the next ensuing two years.
Given under my hand at Stony Plain, this 10th day of January, 1926.
P. W. LUNDY,
Returning Officer.

Calendar.

22—Dance at Holburn Hall.
23—Carnival Dance at Witterborn.
23—Meeting of Stony Plain Agricultural Society in Town hall at 2 p. m.
24—Hockey game in Stony versus Duffield.
27—Dance at Spruce Grove.
29—Dance in Ducholke's Hall.
Feb 3—Dance in Ducholke's hall. Paramount Orchestra.

SPORTING NOTES.

The hockey game at Duffield last Sunday proved to be a very one-sided affair, the Pidgeonites winning by an undesirable margin. The local front line were assisted by A. Very Notable Player, but the combination did not bring the required results, which is easily verified by the score.

The next big hockey match in Stony will be played on the local ice palace next Sunday the 24th, Duffield furnishing the opposition.

Two Wabamun Curling Rinks visited Stony on Sunday and engaged two local rinks skipped by L. Robbins and J. Smith. In the afternoon games, Wabamun won one game by the score of 12-4, while Stony took the other 14-11. In the evening encounters Stony won both games 11-6 and 12-3.

Here and There

Recent advices from London, England, are to the effect that during the first nine months of 1925, 30,817 British emigrants proceeded to Canada. This compares with 17,706 who went to Australia, 7,748 who went to New Zealand and 14,068 who went to the United States.

New financing by Canadian provinces, municipalities and corporations during the month of November show an increase of eight millions over the previous month, the November bond sales being \$10,215,500. This compares with sales of \$11,515,990 in October and with \$5,612,878 in November, 1924.

E. D. Cotterell, Transportation Superintendent of the Canadian Pacific Railway, has issued a statement making effective the resumption of the acceptance of grain for the port of Vancouver under the permit system as handled previously. No touch or damp grain can be shipped on this permit.

The real estate boom in Florida has been affecting the lumber market at Saint John, New Brunswick advantageously for the past few months. A large number of shipments have gone forward to Miami and further consignments will go forward with the steadily increasing demands.

According to a report from Vancouver, about as good as fine as that of the famous deposits from which Quebec supplies the world, has been found near Lytton, British Columbia. The Development Branch of the Canadian Pacific Railway is carefully examining the mineral with a view to investigating the commercial usefulness of the product.

Sir John Martin Harvey, famous English actor, arrived at Saint John, N.B., on the Canadian Pacific liner Montclair, on December 20. He was met by Bert Lange, manager of His Majesty's Theatre, Montreal, and advance agent for Sir John. Mr. Lange has arranged Mr. Harvey's tour through Canada, from Halifax to Vancouver.

Advices from the Montreal office of the Dominion Express Company are to the effect that one of the largest and most valuable consignments of pedigree black foxes ever sent out of Canada, and valued at over \$100,000, had arrived in Switzerland in perfect condition. The 64 foxes will form the nucleus of a fox-breeding ranch in Klosters, Switzerland.

Grandmothers any flappers in the Canadian West? Mrs. Edith Jones, of Leeds, Yorkshire, who sailed back to England on the Canadian Pacific liner Montclair on December 16 told how she learnt to ride horses and do farm work at Plato, Saskatchewan. She had a great time and will endeavor to bring Grandpa, her son and her grandson back to Canada with her in the spring.

Grain handling at the port of Montreal is in excess of the total for last year by 4,851,716 bushels, thus creating a new record in the movement of grain through this port. The total amount handled by the harbor elevators this year comes to 328,850,537 bushels, representing 163,292,046 bushels received and 165,558,491 bushels delivered since the beginning of the year.

An exact replica of the Palestine made memorable by the life of Christ arrived in Montreal from Winnipeg recently on a freight car. The miniature is made up of six million pieces in 16,000 sections and weighs about seven tons. The scenes, cities and villages connected with the Saviour have been reproduced by the Ganci Brothers of Malta, after seven years of unceasing toil.
